DESCRIPTION

The ArkPro series redefines everyday carry with multi-light versatility, iconic flat design, and refined craftsmanship.

Rethink Light

ArkPro and ArkPro Ultra allow you to switch quickly between Pure Flood, spotlight, and UV with the intuitive, precisely calibrated rotary selector. The green laser works separately or together with any of the other 3 lights, creating a total of 7 lighting configurations. ArkPro Lite keeps things simple with white light, UV light, and red light for night vision.

Reimagine Style

ArkPro series sets itself apart with an iconic flat profile, refined design, and masterful craftsmanship.

Its slim, rectangular form slides effortlessly into your pocket, while the solid unibody construction inspires confidence the moment it touches your hand. A raised central ridge runs down the center of the body, adding structure and a sense of depth. Industry-leading precision laser microperforations unveil a dual-color indicator, while the meticulously tuned rotary selector, concave button, and textured grip conform to the hand. The ArkPro debuts the industry's first dual-tone design—Silver Graphite—which is available alongside Matte Black, Phantom Squadron, Orange, and OD Green.

Every detail is crafted not just to be seen, but to be felt—style reimaged through experience.

FEATURES

ArkPro Series

- **Versatile Lighting:** With multiple lighting modes, you'll always have the perfect light for any situation.
- **Sleek and Stylish:** A bold central ridge creates a sense of depth and balance. The engineered grip texture on the side delivers confident control in adverse conditions, while adding a distinct visual rhythm.
- **Perfectly Pocket-Sized:** The flat design fits so comfortably in your pocket that you'll barely notice it. It's built for you to travel light and move freely.
- **Solid Unibody Construction:** With fewer parts and joints, the unibody design delivers exceptional structural strength and a smooth, sturdy feel in your hand.
- **Dual Charging Options:** Olight's magnetic charger snaps on with ease, allowing for convenient charging at home. Built-in USB-C port lets you enjoy access to fast universal charging wherever, whenever.
- **Intuitive Operation:** Designed for intuitive use, the concave control button is easy to find by touch and feels great to use, no matter in the dark or with gloves on.
- **Color-Coded Indicators:** White for brightness, green for battery levels, completed with matching icons, so you'll never mistake one for the other. The new lockout indicator takes the guesswork out of safety, offering a quiet cue that your flashlight is in lockout mode. These subtle details are all visible through Olight's industry-leading laser microperforation technology.

ArkPro/ArkPro Ultra

- **4 Lights, 7 Configurations:** Switch seamlessly between Pure Flood, spotlight, and UV using the intuitive, precisely calibrated rotary selector. The green laser operates separately or together with any of the other 3 lights, giving you 7 total lighting configurations.
- **Pure Flood:** Delivers a soft, seamless beam with a wide field of view, making it the ideal light source for close-up illumination within 5 meters. No glare, no boundaries.
- **Spotlight:** Offers a tight and powerful beam with a well-defined hotspot and usable spill, allowing you to spot details in the distance.
- **UV Light:** Helps spot stains, verify documents, detect oil leaks, and find other fun glowing effects. And use low mode for close-up tasks and high mode for maximum fluorescence.
- **Green Laser:** Bright, precise dot for pointing, highlighting, or playing with pets. Includes both low and high modes. Use separately or together with any of the other 3 light sources.

ArkPro Ultra

- **Olight's Self-Developed LED:** The EIP 1 produces a crystal clear, pure white beam with an incredibly low DUV of < 0.006 - meaning it is free of any distracting color tint, all while achieving an industry-leading efficiency of 134 lumens per watt.
- **Olight's Superalloy OAL™:** Made from Olight's durable O-aluminum, the ArkPro Ultra defies scratches, resists breaking, and shrugs off dents. Your flashlight stays sharp and clean after drops, wear, or heavy outdoor use.
- **The ArkBeat:** At the core of the ArkPro Ultra lies its heart: a glowing symbol that briefly pulses when the light is activated, changing color based on how long you've used the flashlight. It symbolizes a growing connection between you and your gear.

ArkPro Lite

- **Three-in-One Functionality:** Combines white, red, and UV light in one compact tool. Ready for daily use, night tasks, and special detection needs.
- **Red Light:** Unique to ArkPro Lite, the red light protects your natural night vision and attracts fewer bugs. During emergencies, its SOS mode can make all the difference.
- **EDC-Friendly Size:** Shorter and lighter, it's effortlessly portable.
