

Highlights

- **Efficient cooling**
with an output of 50 watts
- **Powerful heating function**
With a heat output of 3000 watts, you can warm up your rooms quickly and efficiently
- **4.5 litre water tank**
Enables a long operating time without constant refilling
- **3 speed levels**
can be adjusted according to your wishes
- **Oscillation function**
ensures an even distribution of air in the room and increases the efficiency of the appliance
- **Intuitive control**
The touch control panel enables simple and precise control of all device functions

The tower air cooler with heating function is the ideal solution for year-round comfort. On hot days, the appliance provides a refreshing breeze with a rated output of 50 watts, while on cooler days it provides cosy warmth with a powerful 3000 watt heating function.

The water tank with a capacity of 4.5 litres enables a long operating time without frequent refilling. The 12-hour timer allows you to precisely control the operation of the appliance and customise it to your needs. The swivelling function ensures even air distribution in the room, which increases the efficiency of the appliance and ensures a pleasant room climate.

Thanks to the three speed levels, you can customise the air circulation. The user-friendly touch control panel and clear LED display make it easy to control all functions. For added convenience, the included remote control allows you to conveniently adjust all settings from a distance.

Whether in the living room, bedroom or office - this tower air cooler combines modern technology with ease of use to provide you with maximum comfort all year round.
