Product description

Shelly Bypass is required by Shelly devices that do not need neutral wire to operate if the load they switch is less than 20 W at 240 VAC.

⚠WARNING! Danger of electrocution. Before starting the installation/mounting the Device, wire check that the breakers are turned off and there is no voltage on their terminals. This can be done with a phase meter or multimeter. When you are sure that there is no voltage, you can proceed to connecting the cables. Mounting/installation of the Device to the power grid has to be performed with caution, by a qualified electrician.

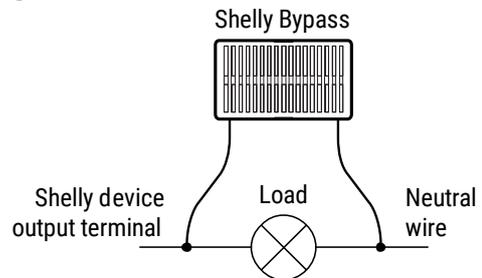

⚠WARNING! Danger of electrocution. Every change in the connections has to be done after ensuring there is no voltage present at the connection points.

⚠CAUTION! Use the Device only with a power grid and appliances that comply with all applicable regulations. A short circuit in the power grid or any appliance connected to the Device may damage the Device, cause fire and/or injury.

⚠CAUTION! Connect the Device only in the way shown in these instructions. Any other method could cause damage and/or injury.

⚠CAUTION! Do not install the device at a place where it is possible to get wet.
